Operational BAF gene sets used for module scoring

Analytical definitions, not an exhaustive map of physical complex composition

Core-shared (8)	SMARCB1, SMARCC1, SMARCC2, SMARCD1, SMARCD2, SMARCE1, ACTL6A, ACTB
cBAF-associated (9)	ARID1B, DPF1, DPF2, DPF3, BCL7A, BCL7B, BCL7C, SS18, SS18L1
PBAF-associated (4)	PBRM1, ARID2, BRD7, PHF10
ncBAF-associated (3)	BRD9, BICRA, BICRAL
Alternative ATPase (1)	SMARCA2

ARID1A is excluded from every score. Labels do not imply exclusive biological membership.
The contact-six, seven-gene contact-associated and six-gene core-refinement sets are distinct definitions.
