
Annotation sensitivity (equal-sample weighting):
strict malignant: n = 21, P = 0.086;
all epithelial: n = 34, P = 0.058.

Full-community boundaries are variable:
median Jaccard = 0.151.
Whole-partition median ARI = 0.50.

Matched ModelIDs: n = 1,177 in both releases. Bars show 95% bootstrap intervals.
A temporal robustness comparison, not independent biological replication.
